

The Next Interactive Flight Operations Manual is Here

We are pleased to announce the debut of the newest interactive Flight Operations Manual (iFOM).

The new iFOM is designed for SR aircraft equipped with Avidyne Entegra avionics and includes standardized information on flight procedures and maneuvers. Included in this manual is the addition of meaningful, rich interactions and videos all designed to enhance the standard FOM text.

The new iFOM can be purchased on the [Apple iBooks Store](#). Please take ample time to familiarize yourself with the new enhancements and procedural changes incorporated within the iFOM. This FOM edition will supersede all previous Avidyne Entegra avionics editions of the manual.
